Yard vs. Ton

We sell stone by the yard because it is used in a landscape setting.

This ensures that our customers are able to calculate the amount needed.

Volume is a consistent measurement while weight may vary due to weather conditions.

One yard will cover approximately:

320 sq.ft. @ 1" deep

160 sq.ft. @ 2" deep

100 sq.ft @ 3" deep

80 sq.ft @ 4" deep
